

DRIVEN BY POSSIBILITY™

GATES GLOBAL AUTOMOTIVE CATALOGUE

THE NEWLY DESIGNED GATES AUTOMOTIVE CATALOGUE INCLUDES MANY IMPROVEMENTS, INNOVATIVE NEW FEATURES AND A MORE INTUITIVE INTERFACE, HELPING MECHANICAL TECHNICIANS AND END USERS FIND THE INFORMATION THEY NEED EASIER AND FASTER.

NOW, WITH ALL OF THE LATEST PRODUCT INFORMATION UPDATED IN REAL TIME, IT ESSENTIALLY ELIMINATES THE NEED FOR A PHYSICAL PRINTED CATALOGUE. AS A GATES CATALOGUE USER, YOU WILL NOW HAVE ACCESS TO ALL OF THESE IMPROVEMENTS AND NEW FEATURES AT THE CLICK OF A BUTTON.

■ EASILY FIND WHAT YOU NEED

Navigation and search is now faster and easier with a single bar replacing the drop-down boxes. Not only will this provide easier access to identify each part number according to the vehicle in the Gates product portfolio, there is also more detailed information for each part, plus links to technical videos and tutorials, technical bulletins and installation tips. A search for the OEM or Gates part number will result in a complete product description. It's also possible to search by manufacturer, model, year and engine, displaying even more specific information like model, year, series, engine and fuel type.

■ NO DETAIL IS TOO SMALL

The updated digital catalogue also features a comprehensive database including detailed product information. As an example, if a component is included in a specific distribution kit, the entire contents of the kit will be displayed with a single click, helping to visually validate and ensure the precise function of the part within the system. If you can't find what you're looking for, there's also a new feature that will connect you directly to Gates through an integrated comment form.

■ CREATE CUSTOMIZED CATALOGUES

An industry-first feature, the Global Automotive catalogue provides the ability to create customized catalogues to collect specific product information, in addition to generating files in PDF format that can be downloaded and printed. This unique function allows for easy creation of individual catalogues, focused on a specific vehicle manufacturer or adapted to the daily needs of mechanics, to provide a few examples.
